DETAILED ACTION

Acknowledgment is made of the amendment filed on 6/22/05. Claims 1-34 are currently pending.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Joao (US 6,549,130).

Joao teaches a computer readable medium that stores computer executable components of a system that electronically controls a physical operation of dangerous equipment comprising:

an electronic key (arming device 15) that stores electronic key data (col. 42, lines 55-59);

an electronic key reader that reads the electronic key data from the electronic key (col. 42, lines 55-59);

an electronic key data analyzer (CPU 4) that is associated with the electronic key reader, the electronic key data analyzer analyzes the read electronic key data and generates a disconnect control data based, at least in part, on the electronic key data (col. 43, lines 31-48);

Art Unit: 2876

a disconnecter (apparatus 1) that is associated with the electronic key data analyzer and the dangerous equipment, the disconnecter disables and re-enables operation of the dangerous equipment, based at least in part on the disconnect control data (see abstract and col. 43, lines 36-48);

the system wherein the electronic key reader obtains the electronic key data via at least one of reading a magnetic strip on an electronic key inserted in the electronic key reader, receiving a radio frequency signal from an electronic key in transmission range of the electronic key reader and reading digital data from an integrated circuit memory chip on an electronic key (col. 42, line 53-col. 43, line 3);

the system wherein the disconnecter controls the flow of at least one of electricity, air, water and hydraulic fluid to the dangerous equipment;

the system further comprising a computer network, the computer network is coupled to one or more electronic key readers, one or more electronic key data analyzers, one or more disconnectors and one or more pieces of dangerous equipment, the computer network conveys a signal between one or more of the electronic key readers, the electronic key data analyzers, the disconnectors and the dangerous equipment;

the system wherein the signal comprises at least one of electronic key data, electronic key data analysis data, equipment data and disconnect control data;

the system wherein the electronic key reader further performs at least one of logging electronic data, logging times when the operation of the piece of dangerous equipment is enabled, logging electronic key holder medical information, logging electronic key holder tasks,

Art Unit: 2876

logging electronic key holder identity, scheduling dangerous equipment operation, scheduling related operation and performing electronic data interchange; and

the system wherein the electronic key data comprises at least one of key identifying information, key holder identity information, key holder medical information, key holder equipment access permissions, key holder equipment qualifications, key holder supervisor contact information, key holder security information and key holder task.

Response to Arguments

3. Newly added limitations filed 6/22/05 have prompted the withdrawal of the rejection(s) of claims 1-34 under 35 U.S.C. 102(b). However, upon further consideration, a new ground(s) of rejection has been made in view of the Joao invention.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2876

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
